

**TRV "Series AZ" with high kv value
straight pattern valve, DN20 - 3/4"**

Description

OVENTROP-Thermostatic radiator valve "Series AZ"

for two pipe central heating systems
PN 10 with circulation pump.

Bronze/brass valve with nickel plated body,
stem made of stainless steel.
For threaded and compression connection.
Dimensions according to DIN 3841 / EN 215.

Valve with high kv value for zone control,
one pipe heating and gravity heating systems.
kv value: 1.1

Thermostat connection thread M 30 x 1.5

Material: Brass
Surface: nickel plated

kv-Value (2K): 1,1
kvmax-Value: 2,8
Size: DN 20
Model: Straight pattern
Connection: 3/4" female thread x 3/4" male thread

max. differential pressure: 1 bar
max. pressure: PN 10
max. temperature: 120 °C

Item-No.: 1187106
EAN-Code: 4026755186628

Subject to technical modifications.
